

Interdisciplinary, experienced and educated mid-level designer with a hollistic approach to form. Versed in and with a feel for applied design, with printed matter, C.A.D. and vinyl prints being central. Creative and effective in producing digital design and interfaces — as in motion shorts, platform-spanning image content, web design and programming. Communicative, structured and pragmatic in a team and as a lone producer. My profession is dealing with the substance matter of institutions, organizations, companies and artists — how their activities, message or story are to be communicated in form, interface and motion.
